## FINAL YEAR ACADEMIC PROJECT

---

**Project Name: GI Products Online Shopping**

**Role: Front End Developer**

**Description:.**

Developed a website for showcasing and ordering Geographical Indication products online. The platform allows users to explore various GI-certified products from different regions of Tamilnadu and place orders directly from verified sellers. The aim was to promote regional Authenticity and support traditional artisans and local producers through digital commerce.

**Responsibilities:**

- Designed and developed the website using HTML, CSS, JavaScript and PHP

## MINI PROJECT 1

---

**Project Name: Online Clocks Shop**

**Role: Full Stack Developer**

**Description:**

Developed a website for display various Watch models with detail such as brand, specifications, features, and price. The website allows users to browse and compare different Watches, helping customers easily view available products before making a purchase.

**Responsibilities:**

- Designed and developed the website using ReactJS , Node.js , MongoDB and Postman API

**Link :** <https://github.com/Karthigairajan251102/ClockShop>

## MINI PROJECT 2

---

**Project Name: Cracker Shop**

**Role: Front End Developer**

**Description:**

Developed a web application for an online crackers shop to streamline the purchase and delivery of festive fireworks. The platform allows users to browse products, view offers, place orders.

**Responsibilities:**

- Designed and developed the website using ReactJS and Redux

**Link :** <https://github.com/Karthigairajan251102/crackers>
